Paper Types

Tamara Munzner
Department of Computer Science
University of British Columbia
CPSC 547, Information Visualization
Week 3: 25 September 2017

http://www.cs.ubc.ca/~tmm/courses/547-17F

Paper types
- each has different contributions, validation methods, structure
  - design studies
  - technique/algorithm
  - evaluation
  - model/taxonomy
  - system
http://www.cs.ubc.ca/~tmm/courses/547-17F

Paper Types: Validation
- design studies
  - qualitative discussion of result images/videos
- technique/algorithm
  - algorithm validation for algorithm papers: computational benchmarks
  - idiom validation for technique papers: controlled experiments
- evaluation
  - (controlled experiment as primary contribution)
- theory/model/taxonomy
  - show power: descriptive, generative, evaluative, (predictive)
- system
  - show power for developer using system

Paper types: Validation
- design studies
  - qualitative discussion of result images/videos
  - abstraction & idiom validation: case studies, field studies, design justification
- technique/algorithm
  - algorithm validation for algorithm papers: computational benchmarks
  - idiom validation for technique papers: controlled experiments
- evaluation
  - (controlled experiment as primary contribution)
- theory/model/taxonomy
  - show power: descriptive, generative, evaluative, (predictive)
- system
  - show power for developer using system

Paper structures
- typical research paper vs expectations for this course final report
  - more on implementation
  - novel research contribution not required
http://www.cs.ubc.ca/~tmm/courses/547-17F/projectdesc.html#outlines

Paper structures
- typical research paper vs expectations for this course final report
  - more on implementation
  - novel research contribution not required

Reading visualization papers
- one strategy: multiple passes
  - title
  - abstract, authors/affiliation
  - flip through, glance at figures, notice structure from section titles
  - skim intro, results/discussion (maybe conclusion)
  - fast read to get big ideas
  - if you don't get something, just keep going
  - second pass to work through details
  - later parts may cast light on earlier parts for badly structured papers
  - third pass to dig deep
  - if its highly relevant, or you're presenting it to class
  - literature search
  - decide when to stop reading: is this relevant to my current concerns?

Literture search
- this course: I will give you seed papers during our 1on1 meetings
- forwards vs backwards search
  - Google Scholar forward citations!
  - only a subset of forwards & backwards citations will be what you need
- building up landscape
  - authors/affiliations will have more signal as you develop expertise

Literature search
- this course: I will give you seed papers during our 1on1 meetings
- forwards vs backwards search
  - Google Scholar forward citations!
  - only a subset of forwards & backwards citations will be what you need
- building up landscape
