

# Lecture 6: Space/Order

Information Visualization  
CPSC 533C, Fall 2006

Tamara Munzner

UBC Computer Science

28 September 2006

# Readings Covered

The Visual Design and Control of Trellis Display R. A. Becker, W. S. Cleveland, and M. J. Shyu Journal of Computational and Statistical Graphics, 5:123-155. (1996).

<http://cm.bell-labs.com/stat/doc/trellis.jcgs.col.ps>

Envisioning Information. Edward Tufte. Graphics Press, 1990.  
Chapter 4: Small Multiples, Chapter 6: Narratives of Space and Time

VisDB: Database Exploration using Multidimensional Visualization,  
Daniel A. Keim and Hans-Peter Kriegel, IEEE CG&A, 1994

<http://www.dbs.informatik.uni-muenchen.de/dbs/projekt/papers/visdb.ps>

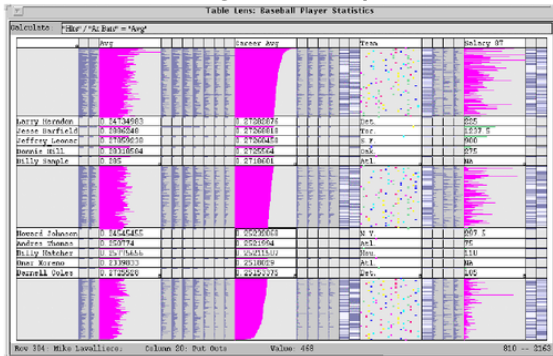

# Space and Order

- ▶ Trellis
  - ▶ find order automatically: main-effects
  - ▶ dot plots, matrices of small multiples
- ▶ VisDB
  - ▶ choice of spacefilling pixel pattern
- ▶ small multiples
  - ▶ side by side better than comparing to memory
- ▶ narratives of space and time
  - ▶ using spatial position to encode temporal data
  - ▶ derived spaces

# Interactive Ordering: Table Lens

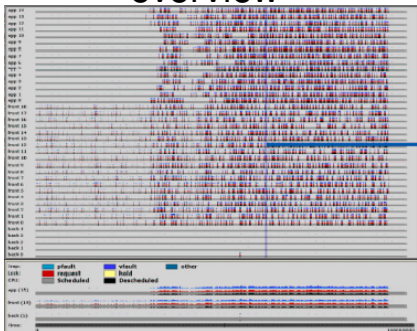

- ▶ click to sort by columns
- ▶ also, is focus+context approach
- ▶ demo: [www.inxight.com/products/sdks/tl](http://www.inxight.com/products/sdks/tl)

# Interactive Ordering: Rivet

- ▶ performance analysis of parallel system
  - ▶ order: machine name vs. lock acquisition time

overview

zoom

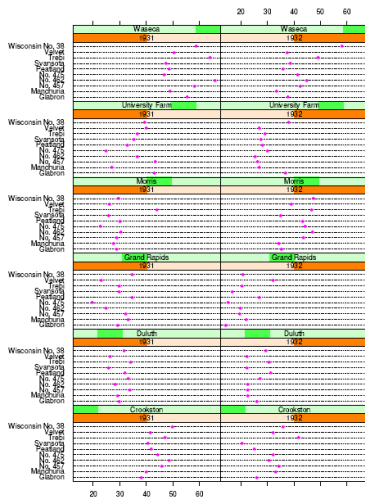

reorder

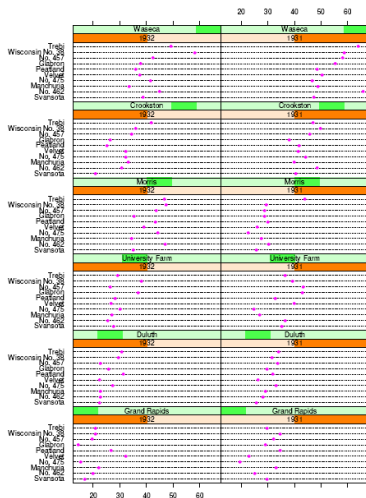

[Bosch, Performance Analysis and Visualization of Parallel Systems Using SimOS and Rivet: A Case Study, HPCA6, 2000.  
[graphics.stanford.edu/papers/rivet\\_argus](http://graphics.stanford.edu/papers/rivet_argus)]

# Automatic Ordering: Trellis

alphabetical site, variety

use group median

[The Visual Design and Control of Trellis Display. Becker, Cleveland, and Shyu. JCSG 5:123-155 1996. [cm.bell-labs.com/stat/doc/trellis.jcgs.col.ps](http://cm.bell-labs.com/stat/doc/trellis.jcgs.col.ps)]

# Trellis Structure

- ▶ conditioning/trellising: choose structure
  - ▶ pick how to subdivide into panels
  - ▶ pick x/y axes for indiv panels
  - ▶ explore space with different choices
    - ▶ multiple conditioning
- ▶ ordering
  - ▶ large-scale: between panels
  - ▶ small-scale: within panels
  
  - ▶ main-effects: sort by group median
    - ▶ derived space, from categorical to ordered

# Confirming Hypothesis

- ▶ dataset error with Morris switched?
- ▶ old trellis: yield against variety given year/site
- ▶ new trellis: yield against site and year given variety
  - ▶ exploration suggested by previous main-effects ordering

[The Visual Design and Control of Trellis Display. Becker, Cleveland, and Shyu. JCSG 5:123-155 1996. [cm.bell-labs.com/stat/doc/trellis.jcgs.col.ps](http://cm.bell-labs.com/stat/doc/trellis.jcgs.col.ps)]

# Partial Residuals

- ▶ fixed dataset, Morris data switched
- ▶ explicitly show differences
  - ▶ take means into account
  - ▶ line is 10% trimmed mean (toss outliers)

[The Visual Design and Control of Trellis Display. Becker, Cleveland, and Shyu. JCSG 5:123-155 1996. [cm.bell-labs.com/stat/doc/trellis.jcgs.col.ps](http://cm.bell-labs.com/stat/doc/trellis.jcgs.col.ps)]

# Banking to 45 Degrees

- ▶ mentioned but not explained in this reading
- ▶ perceptual principle: most accurate angle judgement at 45 degrees
- ▶ pick aspect ratio (height/width) accordingly

[[www.research.att.com/~rab/trellis/sunspot.html](http://www.research.att.com/~rab/trellis/sunspot.html)]

# Multiscale Banking to 45

- ▶ frequency domain analysis

## Sunspot Cycles

Aspect Ratio = 3.96

Aspect Ratio = 22.35

Power Spectrum

Aspect Ratios

**Figure 5. Sunspot observations, 1700-1987.** The first plot shows low-frequency oscillations in the maximum values of sunspot cycles. The second plot brings the individual cycles into greater relief.

# Multiscale Banking to 45

## Downloads of the prefuse toolkit

Aspect Ratio = 1.44

Aspect Ratio = 2.89

Aspect Ratio = 8.81

**Figure 8. Daily download counts of the prefuse visualization toolkit.** The first plot shows a general increase in downloads. The second plot shows weekly variations, including reduced downloads on the weekends. The third plot enables closer inspection of day-to-day spikes and decays.

[Multi-Scale Banking to 45 Degrees. Heer and Agrawala, Proc InfoVis 2006  
[vis.berkeley.edu/papers/banking](http://vis.berkeley.edu/papers/banking)]

# VisDB: Spacefilling Pixels

- ▶ how to draw pixels?
  - ▶ sort, color by relevance
- ▶ local ordering

spiral

2D

[VisDB: Database Exploration using Multidimensional Visualization, Keim and Kriegel, IEEE CG&A, 1994 [www.dbs.informatik.uni-muenchen.de/dbs/projekt/papers/visdb.ps](http://www.dbs.informatik.uni-muenchen.de/dbs/projekt/papers/visdb.ps)]

# VisDB Windows

grouped dimensions

separate dimensions

[VisDB: Database Exploration using Multidimensional Visualization, Keim and Kriegel, IEEE CG&A, 1994 [www.dbs.informatik.uni-muenchen.de/dbs/projekt/papers/visdb.ps](http://www.dbs.informatik.uni-muenchen.de/dbs/projekt/papers/visdb.ps)]

# VisDB Results: Separate Dimensions

spiral

# VisDB Results: Grouped Dimensions

[VisDB: Database Exploration using Multidimensional Visualization, Keim and Kriegel, IEEE CG&A, 1994 [www.dbs.informatik.uni-muenchen.de/dbs/projekt/papers/visdb.ps](http://www.dbs.informatik.uni-muenchen.de/dbs/projekt/papers/visdb.ps)]

# Space vs. Time: Showing Change

literal

abstract

← ..... →  
time for time                      space for time

- ▶ animation: show time using temporal change
  - ▶ good: show process

[[www.geom.uiuc.edu/docs/outreach/oi/evert.mpg](http://www.geom.uiuc.edu/docs/outreach/oi/evert.mpg)]

# Space vs. Time: Showing Change

literal

abstract

time for time

space for time

- ▶ small multiples: show time using space
  - ▶ overview: show each time step in array
  - ▶ compare: side-by-side easier than temporal
    - ▶ external cognition instead of internal memory

# Space vs. Time: Showing Change

literal

abstract

time for time

space for time

- ▶ small multiples: show time using space
  - ▶ overview: show each time step in array
  - ▶ compare: side-by-side easier than temporal
    - ▶ external cognition instead of internal memory
  - ▶ general technique, not just for temporal changes

# Animation vs. Small Multiples

- ▶ Tversky argument: intuition that animation helps is wrong
  - ▶ meta-review of previous studies
  - ▶ often more info shown in animation view so not a fair comparison
  - ▶ carefully chosen segmentation into small multiples better than animation if equivalent information shown

[Animation: Can It Facilitate? Barbara Tversky, Julie Morrison, Mireille Betrancourt. International Journal of Human Computer Studies 57:4, pp 247-262, 2002.]

# Derived Spaces: Slope

- ▶ narrative of space and time
- ▶ Marey train schedule, 1885
  - ▶ horizontal line length: stop length
  - ▶ slope: speed
  - ▶ intersection: time/place of crossing
