## About

The **cat** is a small, usually furry, domesticated, carnivorous mammal that is valued by humans for its companionship and for its ability to hunt vermin and household pests. It is currently the most popular pet in the world.<sup>[1]</sup> Images and videos of cats are widespread on the Internet, including Tumblr <sup>[2]</sup>, DeviantArt <sup>[3]</sup>, Reddit <sup>[4]</sup> and many other places on the internet. The New York Times <sup>[5]</sup> and Thought Catalog <sup>[6]</sup> have reported on the cats' fame on the internet.

## Online History

Pictures of cats have been shared online as early as since the days of Usenet through newsgroups like rec.pets.cats<sup>[20]</sup>, which offered a variety of answers to general questions people have about raising cats. The group's FAQs were originally written in 1992 and released online in four parts over the span of nearly three years. In the late 1990s and early 2000s, the introduction of personal blogging and consumer-grade digital cameras

## Toxoplasmosis

(*Toxoplasma gondii*)

Both oocysts and tissue cysts transform into tachyzoites shortly after ingestion. Tachyzoites localize in neural and muscle tissue and develop into tissue cyst bradyzoites. If a pregnant woman becomes infected, tachyzoites can infect the fetus via the bloodstream.

- d** Diagnostic Stage
- 1) Serological diagnosis.
  - or
  - 2) Direct identification of the parasite from peripheral blood, amniotic fluid, or in tissue sections.
